COMPANY OVERVIEW

CEO: Leon Kim | **Established:** 02. 2012 | **Office:** Seoul(HQ), USA, Vietnam
Business: Global Geospatial Information Data, Deep Learning-based image data analysis

Global Geospatial Information Technology Company.
 Dabeo provides dynamic location-based services that can be easily integrated into your business with data produced from our AI and STUDIO editor.

MAIN PRODUCT

[Service Product]
STUDIO
 STUDIO is a SaaS-based editor that makes creating, editing, and managing map data convenient and straightforward. The STUDIO service provides an API that can be easily integrated for use in various applications such as wayfinding and asset management.

Digital Map
 An interactive digital map covering indoor and outdoor ranges. Customize maps for your business that make the most of optimized location-based technology. Through search and wayfinding, our service enhances customer's familiarity with the venue.

Location-Based Services
 Dabeo provides a build-ready application for immediate deployment. Engage customers with an interactive, immersive and intuitive user experience.

All Applicable to: Shopping malls, Marts, Airports, Subway stations, Factories, Logistics centers, Offices, Theme parks, Universities, Tourist attractions, etc.
