COMPANY OVERVIEW

CEO: Hyunmin Yu | Established: 08. 2020 | Capital: \$14K | Team: 14 | Business: Digital Healthcare

Corevalue Ltd. is developing a service that can help everyone manage their health conveniently and easily. Accordingly, a smart camera and telehealth app were developed and the Dr. Clobo brand was launched in August 2020. The ultimate goal of Corevalue is to create a fundamental answer to helping the medically underprivileged with many services.

MAIN PRODUCT

[Service Product] Dr.Clobo(Camera, App) | Applicable to: Digital Healthcare

Healthcare camera and Telehealth consultation platform

-Healthcare camera that can take detailed pictures of the mouth, ears and nose, and based on this, non-face-to-face medical consultation and health management

-In general, telehealth services are based on smartphones. However, it is difficult to check the teeth, ears, and nose with a smartphone. Therefore, telehealth linked with the oral camera can provide more accurate consultation.

-Provide regular healthcare coaching services, not just one-time consultations. Through Dr.Clobo platform, users and doctors form a long-term relationship rather than a short-term relationship, enabling continuous health management
