COMPANY OVERVIEW

CEO: HyunJae Zhang | **Established:** 01. 2016 | **Capital:** \$430K | **Team:** 10 | **Business:** Software, Medical Device

F&D Partners Inc. supplies a system to medical institutions that photographs the shape and skin of the human body and converts it into medical image information based on 2D/3D complex scan technology.

It uses MEDISCOPE D, a skin magnifying device, and MEDISCOPE C, a body disease detecting device, and supplies DermPACS, which is linked to patient information, to medical institutions in conjunction with EMR, a hospital information system.

MAIN PRODUCT

[Business Area]

#Medical #Clinical Photo # Dermoscopy #Telehealth #Plastic Surgery #Dermatology #Orthoedics

[Service Product]

DermPACS | Applicable to: Derma & Clinical Images Management

PACS(Picture Archiving and Communication System) | DICOM (Digital Imaging and Communications in Medicine)

[Hardware Product]

MEDISCOPE C | Applicable to: Safe and Fast Wireless Medical Image Transmission System

Mediscope C is a convenient system that is linked with a DSLR or mirrorless camera in use and automatically transferred to PACS at the same time as shooting. Medical data images stored in PACS are automatically classified and stored.

MEDISCOPE D | Applicable to: Automatic shooting dermo image control system with distortion free Providing Polarized / Non Polarized light system

MEDISCOPE D is a reinforcing image accuracy with a magnifier using technology that minimizes distortion caused by inter-lens interference, this fast and systematic integrated image management system is linked to smart devices to offer convenient imaging for every patient.
