COMPANY OVERVIEW

CEO: Moon-Kwon Park | Established: 09. 2019 | Capital: \$700 | Team: 17
Business: AIoT Platform, SmartFarm, Mushroom-based alternative protein, material

AIoT Platform(specialized in mushroom/mycelium cultivation) provides the best growing conditions. Automated precision management of farm technology increases the productivity by 90% and the platform supports AI prediction and humidity control for high-quality production. Based on this technology, we are developing alternative proteins with health ingredients and eco-friendly materials by rapidly culturing.

MAIN PRODUCT

MYber | Applicable to: Textiles for medical use

It is a bio fiber that contains the health and eco-friendliness of mushrooms. It can help anti-inflammatory without any artificial ingredients. Also, It doesn't pollute environment in production and decomposition
