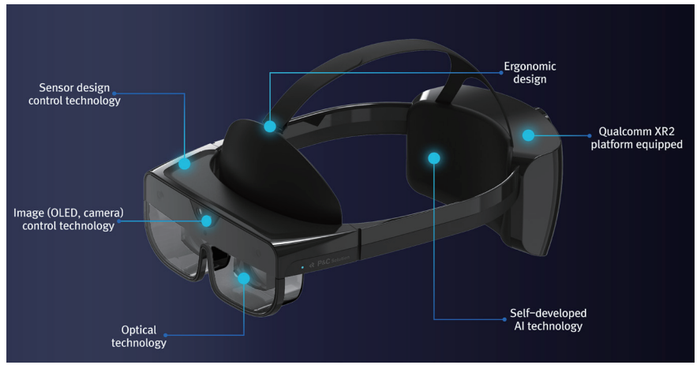
## COMPANY OVERVIEW

**CEO:** Chiwon Choi | **Established:** 03. 2015 | **Capital:** $171K | **Team:** 74 | **Business:** AR Glasses

As a company specialized in metaverse/XR, P&C Solution Co., Ltd. produces XR simulators and AR glasses with our AI-based vision recognition and motion sensor technologies and develops XR solutions to provide the best all-in-one service for our customers.
Today, the digital technology as well as IT is rapidly changing. In this regard, P&C Solution Co., Ltd. has secured its own technology in the 4th Industrial Revolution technology areas and is providing solutions optimized for customer needs, growing as a leader of the relevant industry, based on the experience of development and mass production of highly advanced products.

## MAIN PRODUCT

**[ Service Product ]**
**METAWIN | Applicable to:** Manufacturing, Consctruction, logistics
METAWIN is Smart Factory Comprehensive Solution that combines the Digital Twin technology and AR technology for safety and efficiency. Control based on Digital Twin that identically implements an object or system from the real life in a virtual space supports facility safety and disaster response service. And UWB-based indoor location determination technology enables accident location identification and supports disaster response service. In the event of an issue, collaboration via MEATALENSE helps quickly find a resolution. These functions allow Smart Factory to be implemented by collectively providing all solutions required for industrial fields.


**[ Hardware Product ]**
**METALENSE | Applicable to:** Manufacturing, Consctruction, logistics
It is a HMD (head-mounted display) device that implements augmented reality (AR) content on a transparent lens, and provides a fast and uninterrupted 2K high-resolution screen with excellent image control technology. It shows reality and AR contents recognizing user movements with the best self-developed sensor driving technology and using all 360 degrees of space around the user. With high-end SoC(System-on-Chip), Snapdragon™ XR2 Platform, more vivid and immersive XR experience is possible.
