COMPANY OVERVIEW

CEO: Dongsoo Han | **Established:** 09. 2017 | **Capital:** \$3,500 | **Team:** Z-EMOTION | **Business:** Digital Fashion

“Forward Fashion Faster with Total 3D Digital Fashion Solution”

Our solution completely follows the garment making process in the real world.

Brands can easily adopt 3D through their 1) design & product development with virtual sampling by 3D CAD z-weave’s outputs; 2) sourcing & production with digital tech packs, BOMs available on the online platform z:one; 3) pre-production marketing directly with the HQ-rendered outputs; 4) customer engagement on e-commerce with the virtual fitting application z-fit; 5) after-sales customer loyalty management with metaverse integration, etc.

MAIN PRODUCT

[Product]

zelus | Applicable to: digital fashion, metaverse, digital human, gaming

3D hair & cloth simulation technology, specialized cloth rendering, avatar & body shape creation

- in-house 3D simulation engine using GPU performance
- faster simulation performance than competitors
- hair and face synthesis technology for realistic avatar generation and virtual cloth fitting

z-weave | Applicable to: digital fashion, metaverse, digital human, gaming

Template-based design process, intuitive interface, 2D&3D support, cloth simulation, easy integration into cloth manufacturing machines ; create new patterns or change existing 2d patterns to 3d cloth assets and add more design details in the software

z-one | Applicable to: digital fashion, metaverse, digital human

3D product viewer, cloud-based collaboration platform, real-time virtual fitting solution

easy to modify clothes in style, fabric colorway, etc. in real time without having to manufacture physical samples
